The District Department of Energy and Environment (DOEE) developed an interactive dashboard with new graphs and charts that contain a lot of information about the District's energy and GHG profile, broken down by sector, fuel type, etc., and we also put a lot of information about the draft Clean Energy DC, the main graphs, and all of the action items. The dashboard also contains a very basic scenario modeling for energy efficiency and renewable energy, and lastly, it contains a page of upcoming and past public engagement events.

**The link is:  [http://tabsoft.co/2f6rBxG](http://tabsoft.co/2f6rBxG)**  Please take a few minutes to browse and play around with the pull-down options.  There are 6 pages overall:  1. Introduction;  2. Energy and GHG Profile; 3. Clean Energy DC graphs;  4.  Clean Energy DC action chart; 5. "What if" scenario modeling; 6. Event calendar and engagement.
